THOMAS H. MORGAN
RAYMOND PEARL

VOLUME 43 — 1958

GENETICS

A PERIODICAL RECORD OF INVESTIGATIONS
BEARING ON HEREDITY AND VARIATION

EDITORIAL BOARD

CLARENCE P. OLIVER, *Managing Editor*

WILSON S. STONE, *Managing Editor*

University of Texas

GEORGE W. BEADLE
California Institute of Technology

EVERETT R. DEMPSTER
University of California

DONALD F. JONES
Connecticut Agricultural Experiment Station

R. ALEXANDER BRINK
University of Wisconsin

L. C. DUNN
Columbia University

M. M. RHOADES
University of Illinois

WILLIAM E. CASTLE
University of California

JOHN W. GOWEN
Iowa State College

T. M. SONNEBORN
Indiana University (Representative of the Genetics Society of America)

JAMES F. CROW
University of Wisconsin

A. D. HERSHEY
Carnegie Institution of Washington

CURT STERN
University of California

ALFRED H. STURTEVANT
California Institute of Technology

SEWALL WRIGHT
University of Wisconsin

INDEX

AE, SHIGERU ALBERT, *Colias eurytheme*, genetic studies of, 564
age effect, coincidence and crossing over, 207
ALEXANDER, MARY L., *Drosophila virilis*, developing germ cells, radiation damage from fast neutrons, 458
Allium cepa, rejoining of X-ray-induced chromosome breaks, 362
allopolyploid Gossypium hybrids, 601
ALSTON, RALPH E., *Impatiens balsamina* L., chemical aspects, flower color, 35
ALTENBURG, LUOLIN S., photoreactivating light effect on tertiary-butyl hydroperoxide mutagenesis in Drosophila, 662
ASH, ROY P., *Impatiens balsamina* L., floral color inheritance, 16

bacteriophage T4, heterozygotes, phenotypic properties of, 235
  high negative interference over short segments, 332
barley, effects of X-rays and thermal neutrons on dormant seeds, 728
BEARD, B. H., effects of X-rays and thermal neutrons on dormant seeds, 728
BENDER, MICHAEL A., Drosophila, crossover relationships in ring X and rod X, 48
  Drosophila, radiations hard and soft, in air and nitrogen, 122
BENDIGKEIT, H. E., *Escherichia coli*, caffeine-induced T5 resistance, delay, 647
BIRD, LUTHER S., cotton, Stoneville 20 resistance to bacterial blight disease, 750
BLOMSTRAND, INGBRITT, yellow pigment, development and genic control, Ephestia testis, 697
blood group Oc, cattle, 906
blood groups, X-Z system, sheep, 814
BRINK, R. ALEXANDER, maize, stable somatic mutation to colorless from variegated, 435
  modulator, maize, transportation and stability, 695

caffeine-induced T5 resistance, *E. coli*, 647
CASPARI, E. W., yellow pigment, development and genic control, Ephestia testis, 679
cattle, blood group Oc, 906
  natural antibody, 913
  serum proteins, inheritance, 374
CHAPMAN, A. B., gains from selection of parents, inbred rats, 594
CHASE, MARTHA, bacteriophage T4, high negative interference over short segments, 332
chromosomal aberration yield modified by post-irradiation treatment, 493
chromatid-type and chromosome-type breakage-fusion-bridge cycle, maize endosperm, 737
CHUNG, C. S., gains from selection of parents, inbred rats, 594
CLAYTON, FRANCES E., *Drosophila melanogaster*, lozenge, red pigment in pseudoallelic series, 261
CLELAND, RALPH E., Bradley Moore Davis biography, 1
COCKERHAM, C. C., heterosis and genetic variance, corn, 868
COHN, NORMAN S., *Allium cepa*, rejoining of X-ray-induced chromosome breaks, 362
Colias eurytheme, genetic studies of, 564
components of heterosis, 223
COMSTOCK, R. E., genetic variation in strawberry, 634
  heterosis and genetic variance, corn, 868
corn, heterosis and genetic variance, 868
cotton, Stoneville 20 resistance to bacterial blight disease, 750
crossing over and nondisjunction, interchromosomal effects on, 354
crossing over, coincidence and age, 207
crossover relationships in ring X and rod X, Drosophila, 48

DANFORTH, C. H., mouse, duplicate lower incisors, 139
DAVIS, BRADLEY MOORE, biography of, 1
DAVIS, DONALD W., *Impatiens balsamina* L., floral color inheritance, 16
DEMPSTER, E. R., *Drosophila melanogaster*, laboratory populations, 470
DE SERRES, FREDERICK J., JR., *Neurospora crassa*, purple adenine mutants, reversion of X-ray-induced mutants, 187
developmental rate, selection for, 3
development and genic control of yellow pigment, Ephestia, 679
diallel crosses, 63
DOBZHANSKY, TH., genetic variability through recombination, *D. pseudoobscura*, 844
DOERMANN, A. H., bacteriophage T4, high negative interference over short segments, 332
Drosophila, age, coincidence and crossing over, 207
  crossover relationships in ring X and rod X, 48

developing germ cells, radiation damage from fast neutrons, 458
developmental rate, 3
genetic factors responsible for kinetic activity of X chromosomes, 790
genetic variability through recombination, 844
induction of lethals, effectiveness of radiations of different linear energy transfer, 715
interchromosomal effects on autosomal crossing over and sex chromosome nondisjunction, 354
laboratory populations, 470
lozenge, red pigment in pseudoallelic series, 261
maternally inherited sex-ratio conditions, 274
meiotic behavior of deleted X chromosomes, 547
oocytes, induced rearrangements, 172
oocytes, translocation production, 92
photoreactivating light effect on tertiary-butyl hydroperoxide mutagenesis, 662
position effects at light locus, 395
posterior legs development, 878
radiations hard and soft, in air and nitrogen, 122
recombination between linked inversions, 620
resistance to DDT, 577
second chromosome lethals, 448
tetrad frequency distribution, 215
time of induction, crossovers and translocations, in males, 665
tumorous head, tryptophan effect on penetrance, 164
wild type isoalleles, competition radiations, hard and soft, in air and nitrogen, 122

EDGAR, R. S., bacteriophage T4, heterozygotes, phenotypic properties of, 235
EDINGTON, C. W., induction of lethals, effectiveness of radiations, different linear energy transfer, Drosophila, 715
effectiveness of radiations of different energy transfer, induction of lethals, Drosophila, 715
effects of X-rays and thermal neutrons on dormant seeds, 728
Ephestia, development and genic control of yellow pigment, 679

equilibrium of gene frequency, method for investigating, 419
Escherichia coli, caffeine-induced T5 resistance, delay, 647
purine-requiring strain, selection of revert strains, 386

FABERGÉ, A. C., chromatid-type and chromosome-type breakage-fusion-bridge cycles, maize endosperm, 737
fish, Siamese fighting, 289
floral color chemical aspects, 35
floral color inheritance, 16
gains from selection of parents, inbred rats, 594

GANTNER, JOSEPH F., *Drosophila melanogaster*, second chromosome lethals, 448
GARDNER, C. O., effects of X-rays and thermal neutrons on dormant seeds, 728
GARDNER, ELDON J., *Drosophila melanogaster*, tumorous head, tryptophan effect on penetrance, 164
genes controlling homothallism, yeast, 705
genetic factors responsible for kinetic activity, Drosophila X chromosomes, 790
genetic recombination, Neurospora, 799
genetic variability through recombination, *D. pseudoobscura*, 844
genetic variation in strawberry, 634
Gossypium, allotetraploid, linkage studies, 822
Gossypium hybrid allopolyploids, multivalent formation, segregation, 601
GRAHN, DOUGLAS, mice, radiation response, 835
GUTHRIE, ROBERT, *Escherichia coli*, purine requiring strain, selection of revert strains, 386

HADLEY, H. H., cotton, Stoneville 20 resistance to bacterial blight disease, 750
HAGEN, CHARLES W., JR., *Impatiens balsamina* L., chemical aspects, flower color, 35
HAMMOND, ALICE E., Drosophila, oocyte, translocations produced in, 92
HANNAH-ALAVA, ALOHA, posterior legs, Drosophila, 878
HASKINS, F. A., effects of X-rays and thermal neutrons on dormant seeds, 728
HAYMAN, B. I., diallel crosses, 63
HESSLER, A. Y., *Drosophila melanogaster*, position effects at light locus, 395
heterosis and genetic variance, corn, 868
heterosis, components of, estimation, 223
HICKMAN, C. G., cattle, serum proteins, inheritance, 374
HOCHMAN, BENJAMIN, *Drosophila melanogaster*, wild type isoalleles competition, 101
honeybee, automictic parthenogenesis, 299
radiation induced dominant lethal mutations, 480
HOWARTH, SHEILA, *Salmonella typhimurium*, suppressor mutations in cystine-requiring mutants, 404
IKEDA, YONOSUKE, Saccharomyces, heterothallic behavior of a homothallic strain, 249

Impatiens balsamina L., floral color, chemical aspects, 35
floral color, inheritance, 16
induction of lethals, effectiveness of radiations of different energy transfer, 715
interspecific hybrids, Lycopersicon, 502
isoalleles, wild type, competition in population, 101

JAMES, ALLEN P., yeast, extranuclear mutation spontaneous, 317
JINKS, J. L., components of heterosis, 223
JONES, R. MORLEY, components of heterosis, 223

KASTENBAUM, MARVIN, *Drosophila melanogaster*, tetrad frequency distribution, 215
KEDHARNATH, S., modulator, maize, transposition and stability, 695
KELLEHER, THERESE, genetic variation in strawberry, 634
KHALIL, A., heterosis and genetic variances, corn, 868
KING, JAMES C., resistance to DDT, genetic analysis, *Drosophila melanogaster*, 577
KUBITSCHEK, H. E., *Escherichia coli*, caffeine-induced T5 resistance, delay, 647

LEE, WILLIAM R., honeybee, radiation induced dominant lethal mutations, 480
LEVENE, H., genetic variability through recombination, *D. pseudoobscura*, 844
LEVITAN, MAX, recombination between linked inversions of *D.robusta*, 620
LEWONTIN, R. C., equilibrium of gene frequency, method for investigating, 419
Lilium longiflorum, X-ray effects on chromosomes, 771
LINDSLEY, DAN L., genetic factors responsible for kinetic activity, Drosophila X chromosomes, 790
meiotic behavior, deleted X chromosomes, *Drosophila melanogaster*, 547
linkage studies in Gossypium, 822
lozenge pseudoallele series, red pigment in compounds, 261
LUIPPOLD, H. E., chromosomal aberration yield modified by postirradation treatment, 493
Lycopersicon, interspecific hybrids, cytogenetics of, 502

maize, chromatid-type and chromosome-type breakage-fusion-bridge cycle, 737
effects of X-rays and thermal neutrons on dormant seeds, 728
modulator, transposition and stability, 695
ring chromosome stabilization, 86
stable somatic mutation to colorless from variegated, 435
MALOGOLOWKIN, CHANA, Drosophila, maternally inherited sex-ratio conditions, 274
MARIEN, DANIEL, *Drosophila pseudoobscura*, selection for developmental rate, 3
maternally inherited sex-ratio conditions, Drosophila, 274
MCCRONE, JOSEPHINE, Drosophila, oocytes, induced rearrangements, 172
meiotic behavior of deleted X chromosomes, Drosophila, 547
MILES, PHILIP G., *Schizophyllum commune*, genetics, 530
MITCHELL, M. B., Neurospora, genetic recombination, 799
MITRA, SANDHYA, X-ray effects on *Lilium longiflorum* chromosomes, 771
modulator, transposition and stability, maize, 695
MORROW, E. B., genetic variation in strawberry, 634
mouse, duplicate lower incisors, 139
radiation response, 835
mustard, effects of X-rays and thermal neutrons, 728

natural antibody in cattle, 913
Neurospora crassa, purple adenine mutants, reversion by X-rays, 187
Neurospora, genetic recombination, 799
NOVITSKI, E., *Drosophila melanogaster*, laboratory populations, 470
genetic factors responsible for kinetic activity, Drosophila X chromosomes, 790
oocytes, induced rearrangements, 172
translocations produced in, 92

PARKER, D. R., Drosophila, oocytes, induced rearrangements, 172
Drosophila, oocytes, translocations produced in, 92
parthenogenesis, honeybee, 299
phenotypic properties of heterozygotes, 235
photoreactivating light effect on tertiary-butyl hydroperoxide mutagenesis, Drosophila, 662
position effects at light locus, Drosophila, 395
posterior legs, Drosophila, 878

radiation damage, developing germ cells, Drosophila, 458
radiation induced dominant lethals, honeybee, 480
radiation, rejoining of induced breaks, Allium, 362

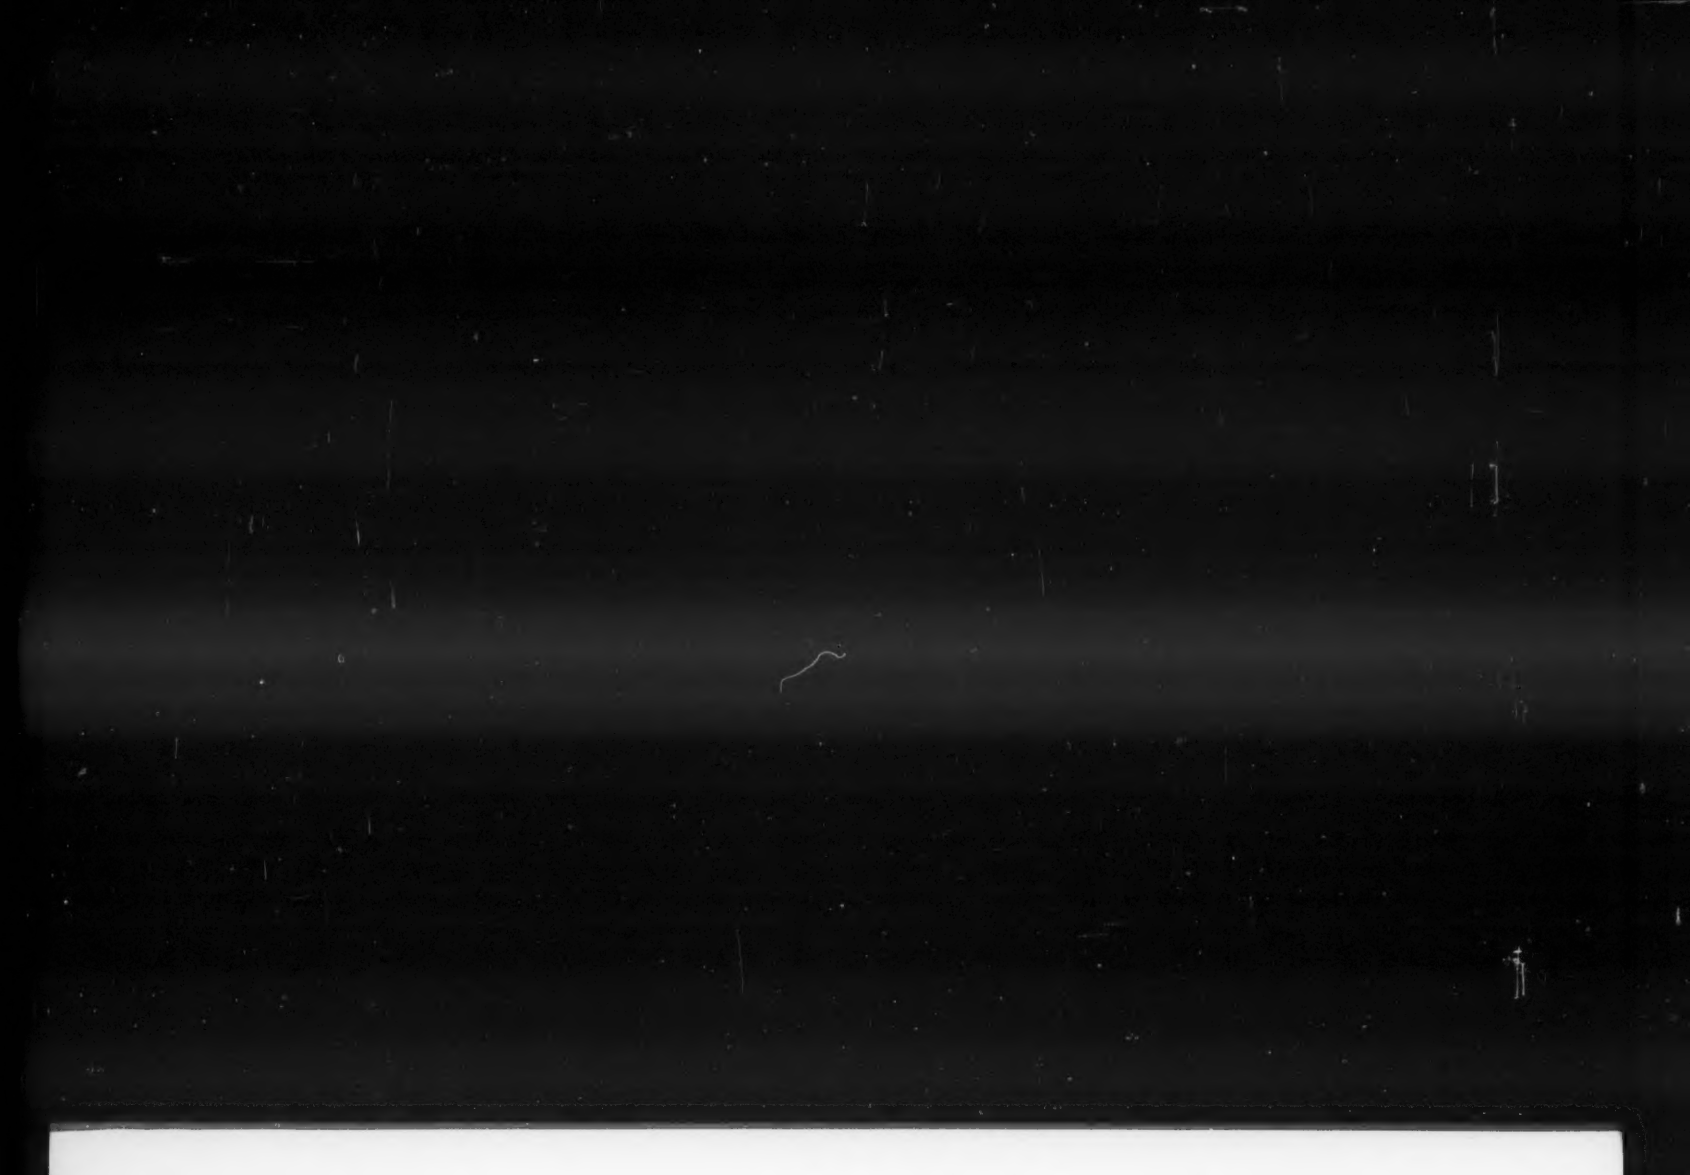
radiation response, mice, 835
radiation, time of induction of crossovers and translocations, Drosophila males, 665
radiations, effects of hard and soft on ring X in air and nitrogen, 122
RANDOLPH, M. L., induction of lethals effectiveness of radiations of different linear energy transfer, Drosophila, 715
RAPER, JOHN R., *Schizophyllum commune*, genetics, 530
RASMUSEN, BENJAMIN A., X-Z system, sheep blood groups, 814
recombination between linked inversions, *D. robusta*, 620
RENDEL, J. M., *Drosophila melanogaster*, age, coincidence and crossing over, 207
reversion of X-ray-induced mutants, Neurospora,, 187
RHYNE, CLAUDE L., Gossypium, allotetraploid, linkage studies, 822
rings chromosome stabilization, maize, 86
ROBINSON, H. F., heterosis and genetic variances, corn, 868

Saccharomyces, heterothallic behavior of a homothallic strain, 249
safflower, effects of X-rays and thermal neutrons, 728
SAITO, HIUGA, Saccharomyces, heterothallic behavior of a homothallic strain, 249
Salmonella typhimurium, suppressor mutations in cystine-requiring mutants, 404
SANDLER, L., *Drosophila melanogaster*, tetrad frequency distribution, 215
  meiotic behavior, deleted X chromosomes, *Drosophila melanogaster*, 547
SARVELLA, PATRICIA, Gossypium hybrid allopolyploids, multivalent formation, segregation, 601
SAWANT, ANAND C., Lycopersicon, interspecific hybrids, cytogenetics of, 502
SCHACHT, LEE E., X-ray induction of crossovers and translocations, Drosophila males, 665
Schizophyllum commune, genetics of, 530
SCHWARTZ, DREW, maize, ring chromosome stabilization, 86
second chromosome lethals, Drosophila, 448
selection, Drosophila developmental rate, 3
  Escherichia coli, revert strains, 386
  rats, inbred, gains from selection, 594
serum proteins of cattle, inherited variations, 374
sex-ratio, maternally inherited conditions, 274
  theoretical, 149
SHAW, RICHARD F., sex-ratio, theoretical, 149
sheep, X-Z system, blood groups, 814
Siamese fighting fish, 289
SIMMONS, JOHN R., *Drosophila melanogaster*, tumorous head, trytophan effect on penetrance, 164
sister chromatid exchanges, 515
SMITHIES, O., cattle, serum proteins, inheritance, 374
SOMME, LAURITZ, resistance to DDT, genetic analysis, *Drosophila melanogaster*, 577
SPASSKY, B., genetic variability through recombination, *D. pseudoobscura*, 844
SPASSKY, N., genetic variability through recombination, *D. pseudoobscura*, 844
SPENCER, PETER E., yeast, extranuclear mutation, spontaneous, 317
spontaneous extranuclear mutation, yeast, 317
SPRAGUE, LUCIAN M., blood group "Oc", cattle, 906
  cattle natural antibody, 913
stable somatic mutation, maize, 435
strawberry, genetic variation in, 634
suppressor mutants, *Salmonella typhimurium*, 404

TAKAHASHI, TOSHIAKI, Saccharomyces, heterothallic behavior of a homothallic strain, 249
  yeast, genes controlling homothallism, 705
TAYLOR, J. HERBERT, sister chromatid exhanges in tritium-labeled chromosomes, 515
TAYLOR, LUCY A., *Impatiens balsamina* L., floral color inheritance, 16
tetrad frequency distribution by rank, 215
tryptophan effect on penetrance of tumorous head in Drosophila, 164
TUCKER, KENNETH W., honeybee, automictic parthenogenesis, 299

WALLBRUNN, HENRY M., Siamese fighting fish, *Betta splendens*, 289
WOLFF, SHELDON, chromosomal aberration yield modified by postirradiation treatment, 493

X-ray effects on *Lilium longiflorum* chromosomes, 771
X-ray induction, crossovers and translocations in Drosophila males, 665
X-Z system, sheep blood groups, 814

yeast, complementary genes controlling homothallism, 705
  extranuclear mutation spontaneous, 317
  heterothallic behavior of a homothallic strain, 249
yellow pigment in testis of Ephestia, development and genic control, 679


ZIMMERING, STANLEY, Drosophila, interchromosomal effects on autosomal crossing over and sex chromosome nondisjunction, 354
